Carilion Clinic and the Virginia Tech Carilion School of Medicine are seeking a **Clinical Psychologist** as a Behavioral Science Faculty member for our well-established, highly regarded Family Medicine residency program. The behavioral science faculty member is well-integrated into the residency faculty and our patient-centered medical home. This dynamic role will provide the opportunity for resident and student teaching, patient care, curriculum development, and the potential for research in a supportive environment.

This position will support Carilion’s hallmarks of service excellence and quality for all job responsibilities. Clinical services may include, but are not limited to, age-appropriate psychological evaluations, individual, group, family, and/or couples therapy, treatment planning and discharge, ensuring that behavioral medicine is integrated into the family medicine residents’ educational experience.

**Location**

Located in the beautiful Blue Ridge region of Virginia, Roanoke is a growing and vibrant small city, and the providing a family-friendly environment with a multitude of outdoor activities immediately accessible. Carilion Clinic is a leader of health care in southwest Virginia and the largest employer in the Roanoke area. [https://www.virginia.org/cities/Roanoke/](https://www.virginia.org/cities/Roanoke/)

For more information, please access the Carilion Clinic career page at [www.carilionclinic.org](http://www.carilionclinic.org). Job Code: MLP170000R

**Other Significant Responsibilities**

1. Assesses patients’ need for services; treats accordingly; and develops/maintains therapeutic relationships with individuals.

2. Serves as a member of the interdisciplinary treatment team, participating in the coordination of the patient’s treatment with the attending physician, care team members, referral sources, family, and/or others.

3. Collaborates with other therapists and team members and supports the process of team building within the department and throughout the organization.

4. Assumes primary responsibility for overseeing and evaluating the Behavioral Health curriculum for family medicine residents, including delivery of didactic instruction.

5. Evaluates the current behavioral medicine program at least annually and implements changes as needed during the Annual Program Evaluation period.

6. Assists with the recruitment and selection of family medicine residents.

7. Utilizes due process and provides support, resources, and remedial training as
necessary for individuals identified as having special needs.

8. Assists with Faculty Development training when appropriate.

9. Precepts cases with residents involving patients and families with difficult psychosocial issues and assists residents in managing psychosocially difficult patients.

10. Facilitates resident and faculty groups as related to residency training and professional development.

11. Participates in research projects and co-facilitates the longitudinal scholarly activities for both residents and faculty.

12. Works to establish a community network of Behavioral Medicine services, agencies and professionals as resources for the residency’s educational program.

13. Provides education and training for other professional disciplines, hospital staff, and/or community groups/individuals.

14. Assists the management team in special projects.

15. Maintains all professional certifications required by Virginia and Carilion Clinic.

16. Enhances professional growth by participating in educational activities to ensure ongoing competence in diagnosis and treatment of patients.

17. Consistently delivers the best in customer service and patient care. As a team member, demonstrates respect, kindness, and empathy in each encounter with patients, family, visitors, and other employees.

18. Champions Carilion Clinic’s mission, vision, and values; complies with the policies and procedures, ethical standards and code of conduct set forth by the company.

19. Other duties as assigned.

**Minimum Qualifications Required**

**Education:** Ph.D. in Psychology from an APA accredited graduate school required.

**Experience:** Two years clinical experience which may include the year of internship required. The second year must be post-graduate and include supervision by a licensed Psychologist or Clinical Psychologist.
